

# Nachdenkzettel Exceptions

## Aufgabe 1

Return-statement in finally

## Aufgabe 2

hello throwing it caught finally after

## Aufgabe 3

Output: "C"

## Aufgabe 4

"public void test()" Exception must also be handled

## Aufgabe 5

If a catch block cannot handle the particular exception it has caught, we can rethrow the exception. The rethrow expression causes the originally thrown object to be rethrown.

## Aufgabe 6

It depends, but probably a) a system exception

## Aufgabe 7

Use of multiple exceptions for different error types
